1 About me

Family name:	Di Pietro	**Scopus ID:**	6603444428
First name:	Daniele Antonio	**MathSciNet ID:**	790640
Age:	46	**ORCID:**	0000-0003-0959-8830
Web page:	http://imag.umontpellier.fr/~di-pietro		
Address (work):	Université de Montpellier CC051, place Eugène Bataillon, 34090 Montpellier (France)		

1.1 Education

6/12/2010 **Habilitation** (*Habilitation à Diriger des Recherches*), École des Ponts (ENPC), Université Paris-Est, *Nonconforming methods for PDEs with diffusion*

28/3/2006 **PhD Thesis**, Università di Bergamo, *Discontinuous Galerkin methods for the incompressible Navier–Stokes equations*. Part of my PhD thesis was carried out at École Polytechnique Fédérale de Lausanne (EPFL)

11/7/2002 **Master in Engineering**, Università di Bergamo, 110/110 with honors (lode)

1.2 Current positions

2024–pres. Corresponding PI of the **ERC SyG NEMESIS**. NEMESIS is a 7.8M€ project for the development of new generation numerical methods for parial differential equations.

1/9/2012–pres. **Full professor** (*Professeur des Universités Classe Exceptionnelle*) at IMAG

1.3 Previous positions

2021–2025 **Director of Institut Montpelliérain Alexander Grothendieck (IMAG)**, Université de Montpellier (UM).

2019–2020 **Deputy director of IMAG**

2014–2020 Head of the *Analyse, Calcul Scientifique Industriel et Optimisation de Montpellier* (ACSIOM) research team

1/4/2007–31/8/2012 **Senior researcher** at the Department of Applied Mathematics of IFP Energies Nouvelles (IFPEN), Rueil-Malmaison (France)

1/2/2006–31/3/2007 **Post-doctoral researcher** at the Centre d'Enseignement et de Recherche en Mathématiques et Calcul Scientifique (CERMICS), ENPC, Paris (France)

1/1/2005–30/6/2005 **Visiting PhD assistant**, CMCS, EPFL, Lausanne (Switzerland)

1.4 Fellowships, awards, and distinctions

2024 *Frontiers of Science Award in Mathematics* prize of the International Congress of Basic Science for the paper *Bridging the Hybrid High-Order and Hybridizable Discontinuous Galerkin methods*, https://dx.doi.org/10.1051/m2an/2015051. A summary of the award-winning paper can be found at the following address: http://hal.archives-ouvertes.fr/hal-04680610

2023–2024 CNRS professor appointment (*délégation CNRS*, 1 year half time) at IMAG

2019–2020 CNRS professor appointment (*délégation CNRS*, 1 year half time) at IMAG

4–5/2018 STaRs invited professor (*Supporting Talented Researchers*) at Università di Bergamo

2016–2017 CNRS professor appointment (1 year half time) at Institut Henri Poincaré (Paris)

2016 ITALY (*Italian TALented Young researchers*) fellowship, Università di Bergamo, Italy

2 Research activities

2.1 Topics

My main research topics include: advanced numerical methods for partial differential equations (PDEs), a priori and a posteriori error analysis, efficient implementation algorithms. I have worked on problems in

several branches of fluid- and solid-mechanics, porous media flows, and electromagnetism, mostly issued from applications in the field of energy and environment.

2.2 Bibliometrics

As of the 20th of January 2025, my **110 works in Scopus** have been **cited 3077 times by 1423 documents** and my **h-index is 30**; see https://www.scopus.com/authid/detail.uri?authorId=6603444428.

At the same date, my **103 works in MathSciNet** have been **cited 2992 times in 1488 publications**; see http://www.ams.org/mathscinet/search/author.html?mrauthid=790640.

Finally, according to Google Scholar, at the same date I have collected **6809 citations** (3834 since 2020), corresponding to an **h-index of 39** (30 since 2020) and an **i10-index of 83** (66 since 2020); see https://scholar.google.fr/citations?user=KFd4Jm8AAAAJ&hl=en.

3 Scientific outreach

3.1 Evaluation of the research

I have acted as referee for all the major international journals in Numerical Analysis and Scientific Computing (*Numer. Math.*, *SIAM J. Numer. Anal.*, *Math. Comp.*, *Math. Models Meth. Appl. Sci.*, *SIAM J. Sci. Comput.*, *J. Comput. Phys.*,*Comp. Math. Appl.*, etc.)

I have also served as referee for the European Research Council as well as several national research agencies and institutions (ANR France, CONACYT Chile, FWF Austrian Science Found, PRIN Italy, The Royal Swedish Academy of Science, NWO Netherlands, Los Alamos National Labs, POR FSE Regione Friuli-Venezia-Giulia, etc.)

I have been member of evaluation panels for ANR and PRIN (Italian Ministery of University and Research) calls. The details are omitted owing to the confidentiality agreement.

3.2 Editorial activity

2024–pres. Editor of Boletín de la Sociedad Matemática Mexicana, Springer and Electronic Research Archive, AIMSPress

2020–pres. Associate editor of Numerical Algorithms, Springer

2020 Editor for the volume *Polyhedral methods in geosciences* of the SEMA-SIMAI Springer series [3]

2016 Editor for the volume *Numerical methods for PDES: State of the Art Techniques* of the SEMA-SIMAI Springer series [4]

3.3 Organization of scientific meetings

2025 Organizer of the mini-symposium *Polytopal methods and applications: A NEMESIS mini-symposium* at the M2P conference (Valencia, Spain)

2024 ERC SyG NEMESIS kick-off seminar (Montpellier, France)

2023 Organizer of the mini-symposium *Recent advancements in Polytopal Methods for Fluid Mechanics* at the CFC2023 conference (Cannes, France)

2022 Member of the Scientific Committeee of the POEMS 2022 conference (Milan, Italy). See https://mox.polimi.it/POEMS2022/

2021 Organizer of the NEMESIS virtual workshop, https://imag.umontpellier.fr/~di-pietro/NEMESIS.html

2020 Organizer of the mini-symposium *Polyhedral discretization methods for geomechanical simulation*, SIAM Conference on Mathematical & Computational Issues in the Geosciences (GS21), June 21–24, 2021 (Milan, Italy)

2020 Organizer of the mini-symposium *Low and high-order polytopal methods: developments and applications*, ALGORITHMY 2020 conference (Vysoke Tatry, Podbanske). Conference switched to hybrid mode after the COVID-19 crisis

2020 Organizer of the mini-symposium *Numerical Methods for Polygonal and Polyhedral Meshes*, WCCM XIV-ECCOMAS 2020 conference (Paris, France). Conference moved to January 2021 in fully virtual mode owing to the COVID-19 crisis

2019 Organizer of the POEMS 2019 conference at CIRM (29 Apr.– 3 May 2019). See https://imag.umontpellier.fr/~di-pietro/poems2019.html, where slides and posters from the conference can be found

2019 Organizer of the mini-symposium *Theoretical and computational advances in polygonal and polyhedral methods*, MAFELAP 2019 (Brunel University, London)

2019–pres. Co-organizer of the *Numerical Algebraic Geometry and Algebraic Numerical Analysis (NAGANA)* workgroup at IMAG. See https://imag.umontpellier.fr/~di-pietro/nagana.html

2017 Organizer of the mini-symposia *Polyhedral Methods and Applications* and *Recent advances on polyhedral discretizations*, ENUMATH 2017 international conference (Bergen, Norway)

2016 Coordinator of the **IHP thematic quarter** *Numerical Methods for PDEs*. The quarter included one summer school and three international conferences:

- Introductory school (IESC, Corse, 5–9 Sept. 2016)
- *Advanced numerical methods: recent developments, analysis, and applications* (IHP, 3–7 Oct. 2016)
- *Recent developments in numerical methods for model reduction* (IHP, 7–10 Nov. 2016)
- *Industry and mathematics* (IHP, 21–23 Nov. 2016)

Detailed information at https://imag.umontpellier.fr/~di-pietro/ihp-nmpdes.html. An IHP thematic quarter requires two years of preparation after the project is selected. One book and two special issues resulted from this thematic quarter:

- D. A. Di Pietro, A. Ern, and L. Formaggia, eds. *Numerical Methods for PDEs. State of the Art Techniques*. Vol. 15 SEMA-SIMAI. Springer International Publishing, 2019. ISBN: 978-3-319-94675-7 (Hardcover) 978-3-319-94676-4 (eBook). DOI: 10.1007/978-3-319-94676-4.
- P. F. Antonietti, J. Droniou, and R. Eymard, eds., *Special Issue: Advanced Numerical Methods: Recent Developments, Analysis and Applications*, Computational Methods in Applied Mathematics, Volume 18, Issue 3.
- T. Leliévre, S. Perotto, G. Rozza, eds. *Special Issue on Model Reduction*, Journal of Scientific Computing, Volume 81, Issue 1. ISSN: 0885-7474 (Print) 1573-7691 (Online).

2007 Organizer of the international workshop *Discontinuous Galerkin Methods: From theoretical developments to industrial applications* (Bergamo, Italy)

3.4 Selection of recent invited presentations

For some of the following presentations, slides (and, occasionally, videos) are available on my web page http://imag.umontpellier.fr/~di-pietro.

3.4.1 Outside France (selection 2011–pres.)

Feb. 2025 8h doctoral course at Scuola Superiore Meridionale, Naples

Feb. 2025 Invited remote seminar at University of Arizona, USA

April–May 2024 Invited doctoral seminar (2h + 2h) at IIT Bombay, India (remote)

May 2024 Invited doctoral seminar at Scuola Superiore Meridionale, Napoli

Feb. 2024 Invited conference at Collegio Ghislieri, Pavia

Feb. 2024 Invited doctoral seminar at Università di Bergamo

May 2023 Invited speaker at M2P, minisymposium *Numerical methods for coupled problems in geometrically complex domains*

May 2023 Invited seminar at MOX, Politecnico di Milano

July 2022 Invited speaker at SIAM AN22, minisymposium *Recent developments in mathematical analysis and numerics for incompressible flow and related problems*. Upcoming

June 2022 Invited speaker at ECCOMAS 2022, minisymposia *Structure preserving and adaptive polytopal methods*, *Structure-Preserving Finite Element Methods in Computational Fluid Dynamics*, and *Multi-scale and multi-level numerical methods for non-linear solids*, Oslo (Norway). Upcoming

May 2022 Plenary speaker at *100 years Unione Matematica Italiana – 800 years Università di Padova* conference

Jan. 2022 Colloquium talk at École Polytechnique Fédérale de Lausanne

May 2021 Invited seminar at Dipartimento di Matematica *Tullio Levi-Civita*, Università di Padova (Italy)

April 2021 Invited speaker at the Bi.discrete seminar, Universität Bielefeld (Germany). Seminar held remotely owing to the COVID-19 crisis

Mar. 2021 Invited speaker at the SIAM Conference on Computational Science and Engineering, minisymposium *Compatible Discretizations for Models in Magnetostatics, Magnetohydrodynamics and Fluid Flow*, Fort Worth, Texas (US). Conference in hybrid mode after the COVID-19 crisis

Jan. 2021 Keynote lecturer at the Oberwolfach thematic week *Nonstandard Finite Element Methods*

Nov. 2020 Invited seminar at Dipartimento di Matematica *Tullio Levi-Civita*, Univ. Padova (Italy). Seminar held remotely owing to the COVID-19 crisis

Jul. 2020 Invited speaker at the ICOSAHOM conference, minisymposium *High order methods on polyhedral meshes*, Vienna (Austria). Held remotely in 2021 owing to the COVID-19 crisis

May 2020 Keynote speaker at the InDAM Workshop *Polygonal methods for PDEs: Theory and applications*, Rome (Italy). Held remotely in 2021 owing to the COVID-19 crisis

Jul. 2019 Invited speaker at the ICIAM 2019 international conference (Valencia, Spain), minisymposium *Polygonal and polyhedral methods in Applied Mathematics*

June 2019 Invited speaker at the MAFELAP 2019 international conference (Brunel University, UK), minisymposium *High Performance Finite Element Technique*

Mar. 2019 Invited seminar at SISSA (Italy)

Oct. 2018 Invited seminar at Univ. Udine (Italy)

May 2018 STaRs (*Supporting Talented Researchers*) invited seminar (4h) at Univ. Bergamo (Italy)

Dec. 2017 Invited seminar at Univ. Bergamo (Italy)

July 2017 Plenary speaker at the *POEMS 2017* international workshop (Univ. Milano Bicocca)

July 2017 Invited doctoral mini-course at Univ. Bergamo

Dec. 2016 Invited seminar at MOX, Politecnico di Milano (Italy)

June 2016 Invited speaker at the MAFELAP 2016 conference, Brunel University (UK), minisymposia *PDE discretization methods on polygonal and polyhedral meshes* and *Hybridizable discontinuous Galerkin methods*

May 2016 Invited speaker at the ZHACM Colloquium, Univ. Zürich-ETHZ (Swiss)

Feb. 2016 Invited seminar at Univ. di Pavia-IMATI (Italy)

Sept. 2015 Invited speaker at the *eXtended Discretization Methods 2015* conference, minisymposium *Polygonal and polyhedral methods*, Ferrara (Italy)

July 2015 Invited lecturer for the PhD course *An introduction to Hybrid High-Order methods*, Univ. di Bergamo

Feb. 2015 Invited seminar at Univ. Milano Bicocca (Italy)

July 2014 Invited speaker at the *World Congress on Computational Mechanics XI*, minisymposium *Structure-preserving and polyhedral discretizations* (Barcelona, Spain)

Feb. 2013 Invited seminar at MOX, Politecnico di Milano (Italy)

Dec. 2011 Invited seminar at Univ. Bergamo (Italy)

June 2011 Invited plenary speaker at the *Finite Volumes for Complex Applications VI* conference, Prague (Czech Republic)

May 2011 Invited seminar at the Department of Mathematics, Univ. of Sussex (UK)

3.4.2 In France (selection 2011–pres.)

Dec. 2024 Plenary speaker at the POEMS 2024 conference, Paris
June 2024 Opening lecture at ERC NEMESIS kick-off workshop, Montpellier
June 2024 Opening lecture at the *Journées MIPS* de l'Université de Montpellier
Mar. 2024 Invited presentation at the ANR HIPOTHEC kick-off workshop, Wissant
Oct. 2023 Invited seminar at Laboratoire Jacques-Louis Lions
June 2023 Lecturer at the école d'été EDF-CEA-INRIA *Discrétisations polyédriques robustes pour la mécanique numérique* (EDF Lab, Paris)
June 2023 Invited speaker at the *Journées d'Occitanie en Mathématiques Appliquées*, Perpignan
Mar. 2023 Keynote speaker at the *Journées Ondes du Sud-Ouest 2023*, Onera, Toulouse
Dec. 2022 LMA2S seminar at Onera (in virtual mode)
Dec. 2021 Keynote speaker at the SimRace workshop, IFPEN, Rueil-Malmaison
Dec. 2020 NAGANA seminar at IMAG, Univ. Montpellier
July 2020 Keynote speaker at the session *Advances in polygonal and polyhedral methods*, WCCM-ECCOMAS 2020, Paris. Held in virtual mode in 2021 owing to the COVID-19 crisis
Dec. 2019 Invited seminar at IFP Energies Nouvelles
Sept. 2019 Invited seminar at Laboratoire de Mathématiques de Besançon
May 2019 Invited seminar at Laboratoire J. A. Dieudonné, Nice
May 2018 Invited speaker at the minisymposium on *Polyhedral methods and applications*, *44e Congrès National d'Analyse Numérique*, Cap d'Agde
Nov. 2017 Invited plenary speaker at the *Journées Multiphasiques et Incertitudes* Nantes
Apr. 2017 Invited seminar at UMPA, Lyon
Mar. 2017 Invited seminar at Institut de Mathémathiques de Bordeaux
Sept. 2016 Invited seminar at *EDF research lab Chatou*, Paris
Sept. 2016 Invited seminar at the *Laboratoire de Mécanique et Génie Civil*, Univ. de Montpellier
May 2016 Invited lecturer at the *Journées Numériques*, Laboratoire Jean Dieudonné, Univ. de Nice
June 2015 Invited lecturer at the CEA-EDF-INRIA school *New Trends in Compatible Discretizations* (Paris)
June 2015 Invited lecturer at the international workshop *Méthode de Galerkine discontinue et ses applications*, CNAM, Paris
June 2015 Invited lecturer at the *École de de Mécanique des Fluides Numérique 2015* (Porquerolles, France)
Mar. 2015 Invited seminar at Départment de Mathématiques d'Orsay, Univ. Paris 11
Jan. 2015 Invited seminar at Institut Camille Jordan, Lyon
Oct. 2014 Invited seminar at Saint-Gobain-CNRS research unit *Surface du Verre et Interfaces*, Paris Aubervilliers
Jan. 2014 Invited seminar at EDF research lab Clamart, Paris
Oct. 2013 Invited seminar at I2M, Aix–Marseille Univ.
June 2013 Invited lecturer at the *École de de Mécanique des Fluides Numérique 2013* (Porquerolles, France)
Jan. 2013 Invited seminar at LAMSID, EDF, Paris Clamart
Dec. 2012 Invited seminar at Laboratoire J. A. Dieudonné, Nice
Oct. 2012 Invited speaker at the workshop *Innovative schemes and highly performing methods for the numerical simulation of fluid flows*, Marseille
Apr. 2012 Invited speaker at the *Workshop on complex grids and fluid flows*, Lyon
Dec. 2011 Invited seminar at Laboratoire de Mathématiques de Besançon
Nov. 2011 Invited seminar at Institut de Mathématiques de Bordeaux
May 2011 Invited seminar at LAGA, Univ. Paris 13

4 Research funding track-record

4.1 Academic research projects

4.1.1 As Principal Investigator (PI)

Reference	Timeframe	Funding	Description
ERC 101115663 (NEMESIS)	2024–2029	2 379 506€	ERC Synergy grant (tot. 7 818 782€). The other PIs are P. Antonietti (Politecnico di Milano), L. Beirão da Veiga (Università Milano Bovisa), and J. Droniou (CNRS). See https://erc-nemesis.eu/
DICE (Région Occitanie)	2022–2025	51 790€	Co-funding for the PhD thesis of M. Salah
ANR-16-IDEX-0006 (RHAMNUS)	2021–2023	75 000€	Funding for an 18-months post-doctoral fellow
ANR-20-MRS2-0004 (NEMESIS)	2020–2022	23 281€	*New methods for numerical simulations*. MRSEI funding scheme
ANR-10-LABX-0002-01	2017–2018	47 700€	Co-funding for the project *Development of an HHO method for the direct simulation of turbulent flows in Code_Saturne*
ANR-15-CE40-0005 (HHOMM)	2015–2019	172 224€	*Hybrid High-Order Methods on polyhedral Meshes*. See http://imag.umontpellier.fr/~di-pietro/HHOMM.html
NUMEV 2014-2-006	2015–2018	50 000€	Co-funding for the PhD thesis of M. Botti
UFI Vinci	2015–2018	90 000€	PhD thesis of F. Chave
ERT IFPEN-LJLL	2008–2013	220 000€	*Enhanced oil recovery and geological sequestration of CO_2: mesh adaptivity, a posteriori error control, and other advanced techniques*, co-PI with M. Vohralík

4.1.2 As unit coordinator or co-investigator

Reference	Timeframe	Role	Funding	Description
MSCA EffECT	2024–2026	MSCA supervisor	195 914€	*Breaking frontiers of Eddy Current Testing simulations through Discrete De Rham methods* (PI: S. Pitassi)
ANR HIPOTHEC	2023–2028	Unit coordinator	604 193€	*HIgh-order POlyhedral meTHods for Eddy Current testing simulations* (PI: S. Lemaire)
ANR MSMΦ*	2023–2027	Co-investigator	268 276€	*Partial differential equations for MultiScale and MultiPhysics modelling* (PI: M. Hillairet)
ANR fast4hho	2017–2021	Unit coordinator	465 686€	*Fast Solvers for robust discretisations in CFD* (PI: F. Hülsemann)
ANR HAMM	2010–2014	Co-investigator	1 060 721€	*Hybrid Architectures and Multiscale Methods* (PI: C. Prud'homme)

ANR Com	VFSit-2009–2012	Co-investigator	180 000€	*Volumes Finis pour Situations Complexes* (PI: J. Droniou)

* Having received an ERC and another ANR funding (HIPOTHEC) the same year, I decided to retire from ANR MSMΦ

4.2 Industrial collaborations as PI

Reference	Timeframe	Funding	Description
IFPEN	2022–2025	142 500€	Funding for the PhD thesis of A. Crippa + scientific collaboration (39 000€)
EDF	2018–2021	135 000€	Funding for the PhD thesis of I. Fontana + scientific collaboration (45 000€)
EDF	2017–2020	36 000€	Co-funding for the project *Development of an HHO method for the direct simulation of turbulent flows in Code_Saturne*
BRGM	2014–2018	60 000€	Co-funding for the PhD thesis of M. Botti
Saint-Gobain	2015–2016	15 000€	*Hybrid High-Order methods for the Cahn–Hilliard equation*, fundamental research program Phi-Zero
EDF	2014–2017	135 000€	Funding for the PhD thesis of R. Riedlbeck + scientific collaboration (45 000€)

5 Supervision of doctoral and post-doctoral fellows

5.1 Supervision of PhD students

2024–pres. **Vito Patierno**, Reynolds-robust methods for magnetohydrodynamics, co-director J. Droniou (CNRS)

2024–pres. **Arax Leroy**, Extended polytopal complexes: design and anaysis, co-director with J. Droniou (CNRS)

2023–pres. **Kirubell Biniam Haile**, Reynolds-robust methods for the incompressible Navier–Stokes equations, co-director with L. Beirão da Veiga (Univ. Milano Bicocca)

2022–pres. **Alessandra Crippa**, HHO methods for fracture propagation

2022–pres. **Marwa Salah**, Serendipity DOF reduction in advanced discrete complexes

2021–pres. **Aurelio Edoardo Spadotto**, Numerical simulation of the electrodeformation of blood cells. Application to medical diagnostic, co-director with S. Mendez (UM)

Def. 2022 **Ilaria Fontana**, Interface models for dam modelling, in collaboration with EDF. TEL manuscript tel-03703584. Ilaria Fontana is now Visiting Assistant Professor at Northwestern University

Def. 2021 **André Harnist**, Hybrid High-Order methods for complex problems in fluid mechanics TEL manuscript tel-03518264. A. Harnist is now Associate Professor (Maître de Conférences) at Université de Technologie de Compiègne

Def. 2021 **Pierre Matalon**, Fast solvers for robust discretizations in computational fluid dynamics, co-director U. Rüde (FAU). TEL manuscript tel-03401691. P. Matalon is now Research Engineer at École Polytechnique

Def. 2018 **Michele Botti**, Advanced polyhedral discretization methods for poromechanical modelling, in collaboration with BRGM. TEL manuscript tel-01871074. M. Botti has obtained a Marie Sklodowska–Curie fellowship then a Researcher position (RTD-A) at MOX, Politecnico di Milano

Def. 2018 **Florent Chave**, Hybrid High-Order methods for interface problems. TEL manuscript tel-01881007. F. Chave is now engineer at EPSILON-ALCEN (Montpellier)

Def. 2017 **Rita Riedlbeck**, A posteriori-based adaptive algorithms for poro-mechanics. TEL manuscript tel-01676709. R. Riedlbeck is now research manager at TWT

Def. 2016 **Joubine Aghili**, Numerical resolution of partial differential equations with variable coefficients. TEL manuscript tel-01616910. J. Aghili is now Associate Professor (*Maître de Conférences*) at University of Strasbourg

Def. 2013 **Jean-Marc Gratien**, Development of a domain-specific embedded language for lowest-order methods on general meshes. TEL manuscript tel-00926232. Co-director with C. Prud'homme (professor, Univ. Strasbourg). J.-M. Gratien is now research engineer at IFPEN

Def. 2013 **Simon Lemaire**, Hybrid finite volume methods for poro-mechanics. TEL manuscript tel-00957292. Co-supervisor with R. Eymard (professor, Univ. Paris-Est). S. Lemaire is now researcher (*Chargé de Recherche*) at INRIA

Def. 2013 **Soleiman Yousef**, A posteriori error estimates and adaptivity for the SAGD proceeding, co-supervisor with M. Vohralík (senior researcher, INRIA) and V. Girault (professor, UPMC — Univ. Pierre et Marie Curie). S. Yousef is now research engineer at IFPEN

I also supervised the PhD students **Mathias Dauphin** (Università di Napoli Federico II, Italy) during his 3-months stay at IMAG (2023–2024), **Silvano Pitassi** (Università di Udine, Italy) during his 2-months stay at IMAG (2021), **Lorenzo Botti** (Università di Bergamo, Italy) and **Sissel Mundal** (University of Bergen) during their 6 months stay at IFPEN.

5.2 Supervision of post-doctoral fellows

2024–pres. **Alexandros Skouras**, DDR methods

2024–pres. **Silvano Pitassi**, DDR methods for electromagnetism. Marie Skłodowska Curie fellowship

2024–pres. **Thomas Radley**, pressure- and Reynolds-robust methods for incompressible flows

2023 **Marien Hanot**, DDR methods for the elasticity complex

2021–2022 **Francesco Bonaldi**, DDR methods for the incompressible Navier–Stokes equations. F. Bonaldi is now Maître de Conférences at Université de Perpignan

2017–2019 **Daniel Castanon Quiroz**, Advanced implementation of Hybrid High-Order methods. D. Castanon Quiroz is now Assistant Professor at UNAM (Mexico City)

2018 **Saghar Heidari**, Advanced aspects of Hybrid High-Order methods for applications in computational physics. S. Heidari is now researcher at Shahid Beheshti University (Iran)

2017–2018 **Alice Raeli**, Hybrid High-Order methods on octree meshes. A. Raeli is now research assistant at Politecnico di Torino, Italy

2016–2017 **Francesco Bonaldi**, Advanced discretization methods for plate problems

2016–2017 **Roberta Tittarelli**, A posteriori error estimators for incompressible problems. R. Tittarelli is now Associate Professor (*Maître de Conférences*) at Université de Besançon

2008–2009 **Ivan Kapyrin**, Multi-points finite volume methods for porous media flows. I. Kapyrin is now Senior Researcher at the Institute of Numerical Mathematics of the Russian Academy of Sciences

5.3 Participation in PhD theses and HDR[1] committees (* Referee)

2024 F. Bonaldi (HDR, Université de Perpignan Via Domitia), W. Boscheri (Université de Savoie Mont Blanc)

2023 M. Hanot (PhD, UM)

2022 S. Pitassi* (PhD, Università di Udine)

2021 L. Sokhna (PhD, UM), S. Krell (HDR, Université de Nice Côte d'Azur)

2019 C. Facciolà* (PhD, Politecnico di Milano)

2018 C. Marcati* (PhD, Université Pierre et Marie Curie)

2017 A. Raeli* (PhD, Université de Bordeaux), A. Della Rocca* (PhD, Politecnico di Milano, Italy), S. Zonca (PhD, Politecnico di Milano, Italy)

2016 R. Porcù* (PhD, Politecnico di Milano, Italy), K. Haddaoui* (PhD, Université Pierre et Marie Curie)

[1] French habilitation for professorship

2015 V. Baron* (PhD, Univ. Nantes, France), K. Mallem* (PhD, Aix-Marseille Univ., France)
2014 J. Bonelle (PhD, EDF-Univ. Paris-Est), A. Duran (PhD, UM)
2013 S. Gérald* (PhD, ONERA-UPMC, referee), M. Cathala (PhD, UM), A. Baldit (PhD, UM)
2012 J. Richard (PhD, UM), T. Hai Ong* (PhD, Univ. Paris-Est, France).

6 Teaching activities

6.1 Post-graduate courses (PhD level)

2025 *From finite elements to polytopal methods*, Scuola Superiore Meridionale, Naples (Italy)
2024 *Hybrid High-Order methods* (2h + 2h), IIT Bombay, India (remote)
2024 *Basic principles of polytopal approximations of partial differential equations* (1h), Scuola Superiore Meridionale (Napoli)
2024 Virtual introductive course on *Hybrid High-Order methods* (4h / 8h), IIT Bombay (India)
2024 *An introduction to Discrete de Rham (DDR) methods* (1h), Università di Bergamo (Italy)
2023 *An introduction to Discrete de Rham (DDR) methods* (2.5h), École d'été CEA-EDF-Inria
2018 *An introduction to the convergence analysis of discretisation methods for PDEs with application to Hybrid High-Order methods* (4h), Univ. Bergamo (Italy)
2016 *Hybrid High-Order methods* (6h), Institut Henri Poincaré (Paris), cf. http://imag.umontpellier.fr/event/ihp-nmpdes
2016 *An introduction to Hybrid High-Order methods* (3h), Università di Bergamo (Italy)
2015 *Hybrid High-Order methods and applications* (18h), doctoral school *Information, Structures et Systèmes*, Univ. Montpellier
2015 *Discontinuous Galerkin methods and applications* (4h), École de Mécanique des Fluides Numériques (Porquerolles, France)
2016 *An introduction to Hybrid High-Order methods* (3h), Università di Bergamo (Italy)
2013 *Discontinuous Galerkin methods and applications* (6h), École de Mécanique des Fluides Numériques (Porquerolles, France)
2012 *Discontinuous Galerkin methods and applications* (20h), doctoral school I2S, Univ. Montpellier

6.2 Undergraduate courses

Legend: CM = *Cours Magistral* (Masterclass), TD = *Travaux Dirigés* (Exercices), TP = *Travaux Pratiques* (Practical exercises). In France 1h CM = 1.5h TD; L*X* = *X*th year of Licence, M*X* = *X*th year of Master

6.2.1 As professor at University of Montpellier

2024–2025 **Analyse Numérique 4** (M2, 33 CM), **Optimisation** (M2, 6CM + 9TD)
2023–2024 **Analyse Numérique 4** (M2, 33 CM), **Optimisation** (M2, 12CM + 12TD)
2022–2023 **Analyse Numérique 4** (M2, 33 CM), **Algèbre Linéaire Numérique** (L2, 15 CM + 10.5 TD)
2021–2022 **Analyse Numérique 4** (M2, 33 CM), **Algèbre Linéaire Numérique** (L2, 15 CM + 10.5 TD)
2020–2021 **Analyse Numérique 3** (M2, 33 CM), **Modélisation Numérique** (M2, 8CM), **Analyse Numérique Matricielle** (L2, 18 CM + 10.5 TD + 13.5 TP)
2019–2020 **Analyse Numérique 3** (M2, 33 CM), **Analyse Numérique Matricielle** (L2, 18 CM + 10.5 TD + 9 TP)
2018–2019 **Analyse Numérique 3** (M2, 33 CM), **Modélisation Numérique** (M2, 7 CM), **Analyse Numérique Matricielle** (L2, 21 CM + 12 TD + 15 TP), **Analyse et Algèbre** (L1, 48 TD), **Biomaths** (L1, 24 TD)
2017–2018 **Analyse Numérique 3** (M2, 33 CM), **Modélisation Numérique** (M2, 7 CM), **Analyse Numérique Matricielle** (L2, 21 CM + 12 TD)
2016–2017 **Analyse Numérique des EDP 3** (M2, 33 CM), **Analyse Numérique Matricielle** (L2, 21 CM + 12 TD)

2015–2016 **Analyse Numérique des EDP 3** (M2, 33 CM), **Analyse Numérique Matricielle** (L2, 21 CM + 12 TD), **Algèbre Linéaire et Analyse 1** (2 x 48 TD)
2014–2015 **Calcul scientifique et Applications** (M2, 28 CM), **Algèbre Linéaire Analyse 1** (48 TD), **Optimisation numérique** (M1, 24 CM + 15 TD + 12 TP), **Biomaths** (L1, 36 TD)
2013–2014 **Calcul scientifique et Applications** (M2, 30 CM), **Algèbre Linéaire Analyse 1** (78 TD + 6 CM)
2012–2013 **Calcul scientifique et Applications** (M2, 30 CM), **Algèbre Linéaire Analyse 1** (78 TD + 6 CM), **Analyse Numérique Matricielle** (21 CM + 12 TD)

For some of the above courses, supports are available on my webpage http://imag.umontpellier.fr/~di-pietro.

6.2.2 Other undergraduate courses in France

UPMC = Université Pierre et Marie Curie (Paris 6)

2011–2012 **Discontinuous Galerkin Methods and Applications** (M2, UPMC, 24h CM), **Calcul Scientifique** (L3, Ecole des Ponts ParisTech, 27 CM)
2010–2011 **Discontinuous Galerkin Methods and Applications** (M2, UPMC, 24h CM), **Calcul Scientifique** (L3, Ecole des Ponts ParisTech, 27 CM)
2009–2010 **Discontinuous Galerkin Methods and Applications** (M2, UPMC, 24h CM), **Calcul Scientifique** (L3, Ecole des Ponts ParisTech, 27 CM)
2008–2009 **Discontinuous Galerkin Methods and Applications** (M2, UPMC, 10 CM), **Calcul Scientifique** (L3, Ecole des Ponts ParisTech, 27 CM)
2007–2008 **Calcul Scientifique** (L3, Ecole des Ponts ParisTech, 27 CM)

6.2.3 Supervision of master theses (* PhD thesis under my direction followed)

2024 **Vito Patierno**, DDR methods for magneto-hydro-dynamics problems
2023 **Giulia Quarta Castelbarco Albani** (2023), co-advisor with P. Antonietti, L. Beirão da Veiga, and J. Droniou
2022 **Marwa Salah*** (3–8/2022), DDR methods for problems in continuum mechanics
2022 **Alessandra Crippa*** (2–8/2022), HHO methods for interface problems
2021 **Aurelio Edoardo Spadotto***, HHO methods for magnetostatics
2020 **Rafiq Driss**, de Rham cohomology for an HHO discretization of the Maxwell equations
2019 **Isaak Bachache**, A numerical exploration of Finite Element Exterior Calculus
2019 **Hind Bouyri**, Implementation of Hybrid High-Order methods for convective terms in Code_Saturne, in collaboration with EDF
2019 **Alessandra Guglielmana**, A low-order method for linear elasticity on general meshes
2018 **André Harnist***, Applications of Hybrid High-Order methods to computational mechanics
2016 **Bastien Hamlat**, Discontinuous Galerkin methods for free-surface flows
2015 **Michele Botti***, Nonconforming discretization methods for poro-mechanics
2015 **Florent Chave***, Hybrid High-Order methods for the Cahn–Hilliard problem, in collaboration with Saint–Gobain
2013 **Rita Riedlbeck***, Spectral methods for the incompressible Navier–Stokes equations
2009 **Soleiman Yousef***, Finite volume methods for petroleum reservoir modelling
2005 **Nicoletta Franchina**, Discontinuous Galerkin methods for problems in fluid mechanics
2004 **Pietro Gabbiadini**, Development of a Matlab code for brake modelling, in collaboration with Freni Brembo

7 Institutional responsibilities

7.1 Main responsibilities

2021–2025 **Director of IMAG**

2022–2025 *Correspondant recherche* for the Department of Mathematics
2019–2020 **Deputy director of IMAG**
2014–2020 Head of the **ACSIOM research team**
2014–2020 Member of the board of directors of **IMAG**
2015–2019 In charge of the second year of the Master *Modeling and Numerical Analysis*
2013–2019 Member of the board of the **Department of Mathematics** of the University of Montpellier
2017–2020 Member of the *Commission de Section 26* (local expert committee for Applied Mathematics)
2012–2015 In charge of the first year of the Master *Mathématiques, Statistique et Applications*

7.2 Participation in selection committees

2022 Member of the selection committee for a post of **Full Professor** (ref. PR-0342490X-9, Université de Montpellier)
2020 Member of the selection committee for a post of **Full Professor** (Politecnico di Milano, Italy)
2019 Member of the selection committee for a post of **Full Professor** (Università di Trento, Italy)
2016 President of the selection committee for a post of **Associate Professor** (ref. 26MCF99, Université de Montpellier)
2015 President of the selection committee for a post of **Full Professor** (ref. 2526PR4118, Université de Nîmes, France)
2014 Member of the selection committee for a post of **Associate Professor** (MAT/08, ref. 2010/MAT3, Politecnico di Milano, Italy)
2014 President of the selection committee for a post of **Full Professor** (ref. 26PR4171, Université de Montpellier)

8 Publications

8.1 Research monographs

[1] D. A. Di Pietro and J. Droniou. *The Hybrid High-Order method for polytopal meshes. Design, analysis, and applications*. Vol. 19. Modeling, Simulation and Application. Springer International Publishing, 2020. ISBN: 978-3-030-37202-6. DOI: 10.1007/978-3-030-37203-3.

[2] D. A. Di Pietro and A. Ern. *Mathematical aspects of discontinuous Galerkin methods*. Vol. 69. Mathématiques & Applications (Berlin) [Mathematics & Applications]. Springer, Heidelberg, 2012. ISBN: 978-3-642-22979-4. DOI: 10.1007/978-3-642-22980-0.

8.2 Edited books

[3] D. A. Di Pietro, L. Formaggia, and R. Masson, eds. *Polyhedral Methods in Geosciences*. Vol. 27. SEMA-SIMAI. Springer International Publishing, 2021. ISBN: 978-3-030-69362-6. DOI: 10.1007/978-3-030-69363-3.

[4] D. A. Di Pietro, A. Ern, and L. Formaggia, eds. *Numerical Methods for PDEs. State of the Art Techniques*. Vol. 15. SEMA-SIMAI. Springer International Publishing, 2018. ISBN: 978-3-319-94675-7. DOI: 10.1007/978-3-319-94676-4.

8.3 Papers in international peer-reviewed journals
